Education

COOP Careers San Francisco, CA
Data Analytics Fellowship *Feb. 2026 - Jun. 2026*

- Completed a 16-week fellowship program, strengthening expertise in data cleaning, transformation, analysis, and visualization using SQL, Python, and Tableau, alongside assistance in professional development.
- Executed 200+ hours of intensive data analytics training, mastering end-to-end ETL processes, advanced SQL querying, Python scripting, and Tableau visualization to solve complex, real-world business data challenges.
- Spearheaded a 4-analyst consultancy team to conduct exploratory data analysis on digital marketing performance; tracked key growth metrics (CPA, CPC, CVR) to deliver data-driven budget optimization strategies.
- Evaluated campaign inventory across 17 ad exchanges and 231 publisher URLs; analyzing frequency distributions and KPIs to isolate high-performing niche distributors over high-volume distributors, delivering insights to optimize media spend.

University of California, Santa Barbara Santa Barbara, CA
B.S. in Statistics & Data Science *Sep. 2021 - Sep. 2025*

Projects

San Francisco Crime Desk | *Python, PostgreSQL, Airflow, dbt* *Aug. 2026 - Present*

- Designed an end-to-end data platform processing 1,059,613+ real-world government records (2018–present) with a daily self-healing ELT pipeline orchestrated with Apache Airflow.
- Engineered SQL-driven feature pipelines to prepare daily incident aggregates and geolocation data from PostgreSQL, feeding a Ridge regression forecast model and a K-Means clustering model, with outputs stored back into Postgres for dashboard consumption.
- Built a multi-page analytics dashboard (Overview, By Neighborhood, By Category, Trends) with date-range filtering and hourly breakdowns, powered by dbt data marts.

NBA MVP Prediction Project | *R, tidymodels, ggplot2* *Jun. 2025*

- Developed an end-to-end predictive modeling pipeline in R (tidymodels) to forecast MVP award shares based on a 40-year historical dataset.
- Evaluated Random Forest and XGBoost architectures through cross-validation, achieving an RMSE of 0.05 and successfully back-testing the model to predict the 2025 winner.

Experience

Max's Opera Cafe San Francisco, CA
Front-of-House Operations Associate *Jun. 2025 - Mar. 2026*

- Utilized restaurant POS system to accurately process 100+ daily transactions and online orders, ensuring customer satisfaction and financial precision in a high-volume, fast-paced environment.
- Monitored real-time stock levels and mitigated order discrepancies by communicating with the kitchen and providing alternatives to customers, maintaining high fulfillment rates.

Skills

Programming: Python, R, SQL
Data Engineering: PostgreSQL, Apache Airflow, dbt, Redis
Libraries: pandas, NumPy, scikit-learn, matplotlib, ggplot2, dplyr, tidymodels
Visualization: Tableau
Tools: Linux, Git, Jupyter Notebook, Excel
Certifications: Google Data Analytics Professional Certificate, Google AI Essentials Certificate
